

Vision To provide strong fundamentals in Science and Technology in the undergraduate level degree programs and to develop research activities in Chemistry. To introduce innovative teaching methodologies and evaluation system to help students progress in various fields To impart knowledge of the fundamental principles and contemporary practices of chemistry, and to use them to investigate, explain and predict new phenomena. To make students aware of the application of scientific principles, particularly those of chemistry, to societal issues. The Department of Chemistry strives for excellence in all aspects of teaching and researches, to produce Engineers of high quality required in Industries/academy Mission To create and maintain programs of excellence in the areas of research, education and public outreach. We foster and encourage the pursuit of new knowledge in chemical sciences and engineering. To impart and enhance the advanced knowledge & skills of Chemistry to Engineering and Technology students. To inculcate the importance of Basic Sciences and develop a natural flair for Engineering and Technology Recent Advances in Chemical and Material Sciences (RACMS 2016)
